

Renewable for Life

TSX-V: SRA

We are seeking a Chief Geologist, VP Exploration

As the Chief Geologist, VP Exploration you will be reporting directly to the President & CEO.

Duties expected of this role include, but are not limited to, the following:

- Lead all exploration activities on SGP's current assets and identify and assess new high potential prospects including green field and advanced staged projects
- Develop a risk adjusted exploration strategy for each project; prepare exploration plans and budgets to fit with project scopes and timelines
- Ensure drilling activities are carried out as per exploration plans
- Lead and build a resource team of in-house talent and consultants to maximize the effectiveness of exploration and development expenditures
- Provide leadership and mentoring to other team members within the Company
- Day to day management of geological personnel and contractors, and liaising with project engineers

The position is based in Vancouver, BC (Corporate Head Office) and requires significant travel to the US.

Requirements:

- M.Sc. Geology, professional certification status
- Minimum 10 years proven experience in exploration & development of geothermal resources
- Oil & gas or mining background may be considered
- Strong structural understanding
- Strong geophysical and geological interpretive skills
- Strong computer skills and familiarity with 3D software
- Good multi-task management and reporting skills

SGP seeks talented individuals from diverse backgrounds who demonstrate strong interpersonal and communication skills and are driven by an entrepreneurial spirit.

SGP offers competitive salaries, supports professional development and provides green company benefits.
