

Sixth Annual Conference for the Development and Utilization of Deep Geothermal Energy

March 26-29, 2017, Beijing, China

Geothermal Engineering Research Center, China University of Geosciences, Beijing (CUGB)

The 6th Annual Conference for the Development and Utilization of Geothermal Energy will be held in Beijing, China on March 26-29, 2017.

Goals:

1. To bring together engineers, scientists, and managers in the geothermal industry.
2. Serve as a public forum for the exchange of ideas on the exploration, development, and use of geothermal resources.
3. Promote research, exploration and development of geothermal energy in ways compatible with the environment in China.
4. Cooperate with national and international academic institutions, industry and government agencies to encourage economically and environmentally sound development and bring the innovative technology to china.

Topics:

- Exploration: geology, geophysics, geochemistry, heat flow studies
- Drilling and well stimulation
- Power generation technologies
- Co-production from oil and gas fields
- Enhanced Geothermal Systems (EGS)
- Reservoir Engineering: injection, numerical simulation, empirical methods, tracers, etc.
- Direct use: heat pumps, space heating, and cooling
- Others

Papers:

Papers accepted for presentation and/or publication are produced on a standard template that we supply. The papers will be available as a Proceedings CD. We removed the process of submitting abstracts for simplicity. Instead, papers can be submitted directly to geopowerchina@163.com for consideration.

Sponsorship:

We invite companies and sponsors to offer financial support for the conference. Contributions from sponsors allow us to keep the registration fee low (\$500). Sponsors will receive acknowledgement in the opening sessions, literature papers, and the conference proceedings. Please contact Prof. Kewen Li for further details.
