Reserve Your Hotel Rooms for GRC Annual Meeting & Expo

Hotel room reservations can now be made for the biggest geothermal energy event of the year to be held September 15-18 in Palm Springs, California, USA.

Davis, California, USA. Reservations can now be made for hotel rooms for the Geothermal Resources Council (GRC) Annual Meeting & Expo, being held in Palm Springs, California, USA from September 15-18, 2019. All the events are in one central location, at the Palm Springs Convention Center. The official hotels are either connected to the convention center or just one block away.

The GRC has contracted with the Renaissance Palm Springs and Hilton Palm Springs hotels for a discounted block of rooms. At both hotels there is a choice of rooms with either two double beds or a king bed starting at \$150 a night excluding taxes and fees.

Attendees can make their reservations on secure websites prepared specially for the GRC. The links are available from the GRC Annual Meeting website at: www.geothermal.org/meet-new.html.

The GRC strongly encourage you to stay at one of the conference hotels to gain the benefits of networking with colleagues, being close to the event venue, and relaxing in nice hotel properties.

We make every effort to negotiate the best possible rates. When you stay at the conference hotels, you help GRC meet our contractual obligations, avoid paying financial damages for this meeting, secure suitable venues and preferred dates-and-rates for future conferences.

The GRC Annual Meeting is the industry's largest annual gathering of leading geothermal energy scientists, producers, renewable energy industry stakeholders, regulators, utilities, and key associated business leaders. The four-day event will offer technical, policy, and market conference sessions, educational seminars, tours of local geothermal and renewable energy projects, and numerous networking opportunities.

Over 1,000 attendees came to the 2018 GRC Annual Meeting and Expo from over 40 different countries, highlighting the GRC's role in connecting the global geothermal energy community. With increasing interest in geothermal as a reliable source of renewable energy providing both flexible and baseload power production around the world, the GRC is looking ahead to an even stronger international attendance in 2019.

For information on how to sponsor this event, contact Anh Lay, GRC at (530) 758-2360 X100 or alay@geothermal.org.
