

## GRC and Earth Science Week

GRC has been asked to provide an additional 10,000 copies of our Geothermal Energy Educational Poster, to be included in this year's school educational packets, as part of the Earth Science Week Toolkit.

Distributed by the American Geosciences Institute (AGI), this year's Earth Science Week theme is 'Earth Materials in Our Lives.'

The goal of the poster is to help educate middle schoolers on geothermal energy, and help spread the word of our industry's technologies and mission to the general public. The 22" x 34" posters are doubled sided, featuring both an English and a Spanish version.

Special thanks go to our poster sponsors: Ormat, EGS Inc., Horizon Well Logging, Dewhurst Group, Coso Operating Co., and Cyrq Energy.
