

**Monte C. Morrison, PE, ASP, EMT**  
**Hot H2O Engineering**

Mr. Morrison has more than 40 years of experience in the development, construction, and management of 22 geothermal power plants and geothermal well fields within the geothermal industry. He has managed geothermal power plants and well fields, including drilling management in Nevada, California, Hawaii, Utah and New Mexico for seven companies from Plant Management to Executive. Mr. Morrison currently sits on the Board of Directors of Geothermal Rising, the international association of geothermal professionals. I also provided executive safety management in British Columbia (Hydro and Wind) and Iceland (Geothermal). Mr. Morrison is a registered Chemical Engineer in the US (Nevada) and also a Certified Associate Safety Professional (US BCSP) and a Certified EMT (Nevada).

**Geothermal Involvement**

I have been involved with GR and its predecessor since 1987, providing countless tours of power plants I managed. I also did classes in local schools and taught the basics of geothermal energy and power generation from Kindergarten to the US Naval Academy. I have been on the GR Board for three years and have been a presenter and MC for GR events in past years. . I have been on the Executive Committee, Finance and Foundation Committee, chair of the Inspector's Committee and recently the chair of the International Committee.

**A written Statement**

I have been interested in geothermal energy since Jr. High and have been blessed to have been working in the industry since 1985 while still a student at the University of Nevada. My passion has been the Operations and Maintenance Management of multiple power plants in the western US and have been able to share that passion with seven geothermal companies. I bring the practice and experience of the O&M side and now development of geothermal, to the Board. I was honored with the Ben Holt Power Plant award in 2022 before being elected to the GR Board. Being elected was another accomplishment I had always hoped to achieve. I was finally able to share my passion and enthusiasm with the Board for the last three years. I have been on the Executive Committee, Finance and Foundation Committee, chair of the Inspector's Committee and recently the chair of the International Committee. If re-elected, I will bring my energy, experience and expertise to the Board for another three years. It has been a pleasure to serve the Geothermal Community.

**Your plan**

I will bring the foundation of 40+ years of geothermal power plant development, construction, and management to the Board. I have the enthusiasm and experience to be strong participant and leader. Being in the industry for so long, I am a lifelong believer in the science and business models that have succeeded for decades. If re-elected, I will bring my energy, experience and expertise to the Board for another three years. It has been a pleasure to serve the Geothermal Community.
