

The Payne Institute for Public Policy

AT COLORADO SCHOOL OF MINES

SAVE THE DATE: December 2, 2025 Geothermal Solutions Symposium

Meeting Overview:

Geothermal energy is a source of clean, reliable baseload electricity and a heating and cooling resource, poised to improve American energy security, decarbonization, and grid stability. However, the path to scaling geothermal is not without hurdles. This summit will focus on identifying those challenges and invites innovators in this space to share their work towards finding solutions. With bipartisan support for geothermal and technological advancements in next-gen systems, the time to explore these difficult questions is now.

Please join us in December for targeted discussions about the next steps for the geothermal industry!

Location:

Colorado School of Mines
Student Center Ballroom ABC

When:

Tuesday, December 2nd, 2025
8:00 am – 5:30 pm

Sessions Include:

- Engineering Innovations
- Geotechnical & Subsurface Exploration
- Industry Insights
- Land-use, Policy & Permitting
- Scaling the Geothermal Industry
- Project Economics
