GEOTHERMAL RISING NEXT GEN GEO

Position Title: Student Section Subcommittee Lead, Geothermal Rising Student Committee
Position Term:1 year January-December with the option of 1 additional year reelection
Position time commitment: 4-8 hours a month

The Advisor for this position is: A Geothermal Rising Professional Member or former Geothermal Rising Student Committee President/Subcommittee Lead.

General Student Committee Leadership Responsibilities:
As a Student Committee Leader, the primary responsibilities include preparing the specific subcommittee's plan and budget for the term, setting yearly goals, and ensuring their successful completion by the end of the term. Using a provided template of previous goals, events, and incentives, subcommittee leads will develop their strategic approach. Additionally, leaders are required to submit quarterly progress reports for the Board of Directors, collaborate with the committee president to align goals with the broader organizational objectives, and maintain clear communication to ensure the subcommittee's contributions are in line with the overarching mission of Geothermal Rising.

Position Description:
The Student Section Lead is responsible for the Student Section Subcommittee and organizes events to boost the student's and young professionals' involvement with the GR Student Committee. The Chair helps grow student membership and build a strong connection between the GR Student Committee, our organizational members, and all students interested in geothermal energy. The Student Section Chair also works closely with the GR Director of Policy and Education to support and maintain existing student sections and create more student sections around the globe. This position may be held by up to 2 individuals.

Position Responsibilities and Tasks:

- Plan recurring events organized by the subcommittee such as the Student Research Award and virtual student section events.
- Design and pilot new outreach initiatives to help grow student membership and general awareness of the benefits of geothermal energy
- Provide guidance and assign tasks to the subcommittee members, and ensure that all tasks are met according to the timeline
- Provides monthly updates to the student committee president and other members of the leadership team

GEOTHERMAL RISING NEXT GEN GEO

- Support existing Student Sections and create new ones with assistance from the Student Committee and GR staff.
- Communicate and collaborate with other Student Subcommittee Chairs to effectively and efficiently educate, engage, and support the mission of the Geothermal Rising Student Committee
- Ensure Student Section Funding Guidelines are enforced appropriately and updated as needed.
- Assist the Student Committee President in allocating funds to individual Student Sections as requested to support their operations.

Advisor Role and Responsibilities:

- Provide guidance and mentorship to the Student Section Lead and other subcommittee members through monthly meetings and direct communications through emails and social media means
- Help draft the subcommittee plan and budget for the term and ensure the plan is accomplished by the end of the term
- Support the execution and planning of events organized by the subcommittee, such as the student research award, webinars, …etc
- Provide guidance on how to boost student membership and the number of student sections and support the student sections when needed
- Help with the subcommittee leadership transition between terms.
- Mentor the Subcommittee Lead in developing professional skills and industry knowledge
- Ensure alignment between student section activities and the overall goals of Geothermal Rising

Advisor Time Commitment:

- Average of 3 hours a month
